META MEDICAL
Research Institute

- *Accurate Data Collection*
- *Rapid Reporting*
- *Superior Patient Care*

Welcome

META Medical Research Institute was established for conducting clinical trials for the pharmaceutical and device industries. We are a state-of-the-art research institute dedicated to Phase I - IV clinical trials.

Overview

Our facility conducts over 95,000 patient visits in various specialties annually.

Mission: META Medical Research Institute is dedicated to provide superior care, accurate data collection, rapid reporting and open communication with sponsors, CROs and regulatory agencies.

Major Research Areas: Our therapeutic specialties include: Chronic pain, Acute pain, Sports Medicine, Gastroenterology, and Ophthalmology.

Staff Expertise: Our Principal Investigator and his research staff have over 50 years' of clinical research and regulatory compliance experience.

Facility: META Medical Research Institute is located in the heart of Dayton's medical community. The facility, founded in 1994, occupies 36,000 square feet dedicated to healthcare and research.

Equipment: Our affiliates currently operate more than 2 million dollars worth of instrumentation and support equipment.

Sponsors and CROs can rely on our site to consistently meet or exceed enrollment goals and capture accurate high quality data while maintaining superior standards. At META Medical Research Institute, we are conducting clinical trials under strict FDA, ICH and GCP guidelines.

Our affiliates are multi-specialty outpatient clinics with an accredited Ambulatory Surgery Center. Our affiliates employ advanced equipment and procedures to deliver safe and effective healthcare. A HIPAA-compliant EMR system was implemented in 2004.

- On-site urgent care providers and anesthesiologists to treat any acute issues
- 24/7 telephone contact number for patients
- The region's only Trauma Level I hospital is within 5 miles of the institute
- Capable of conducting Phase I - IV CNS, acute and chronic pain, acute illness and injury trials
- HIPAA-compliant CTMS
- Extensive database of subjects searchable by ICD codes for any therapeutic indication for clinical trials
- Capability of using central IRB; rapid contract and budget negotiation
- Dedicated monitoring workspace with WiFi and printer/scanner access
- Secure, on-site long-term storage for research records
- Our team consists of a Medical Director/PI with over 10 years' experience conducting clinical trials, 3 Clinical Research Coordinators, a dedicated Regulatory Specialist, QA Specialist, Research Manager and Marketing team
